

Minutes

Asbestos Roundtable

April 4, 2017
Room 45 Metcalf Building

- **How do we treat linoleum (RACM) vs. sheet vinyl (Cat I)?**
 - *Good dialog between the consultants and contractors with discussion of removal techniques and some of the concerns in regards to CAT I & II non-regulated removal.*
 - *Questions from the regulated community pertained to rendering non-regulated ACM regulated.*
 - *Questions from the contractors on how to read and interpret laboratory results in comparison to the inspection report.*
- **Do all infrastructures need an asbestos inspection?**
 - *Comments on examples of infrastructures and how to tie infrastructures to facilities.*
 - *Concerns of residential infrastructures were addressed by the NESHAP definitions of installation, infrastructures for residents are rare, and usually void the residential exemption.*
- **Wallboard results may not be averaged (composited).**
 - *Wallboard systems was addressed and discussed on when the material becomes regulated.*

Inspectors calling floor tile regulated

- *Very good dialog between the contractor and consultants in regards to 17.74.354(6)(b) "the scope and purpose of the inspection and how it corresponds to the extent of the planned demolition or renovation activities".*

Changing a contractor on a permitted project

- *If an owner needs to change an asbestos contractor, the mandatory wait would not restart, if it had already been met.*
